The regulation and coordination of economic activity represents an essential element of European policy-making since the beginning of the European integration process. Partly being brought about by previous integrative steps, economic (policy) interdependencies provide for functionalist justifications for further integration and communitarianization. The dynamic institutional development observable in the context of the recent (macro-)economic troubles offers many examples of such processes. At the same time, the development of European economic policies is subject to political decision-making processes and thus follows a political logic. Also, diverse national economic policies, strategies, and institutional settings continue to co-exist. The interdependencies between economies, politics, and policies at different levels (national, international, central) constitute an intriguing field of study for (Comparative) Political Economy (CPE). The seminar aims to explore this field and to introduce students to methods, techniques, and tools of CPE to conduct their own independent research.

The seminar envisages the discussion of weekly readings in group work as well as plenary. Presentations should be discussed with the lecturer at least one week ahead of the presentation. Presenters are expected to build on and to go beyond the weekly readings so as to provide input for further discussions.

A personal remark concerning a matter of course: Preparation for the discussion of weekly readings is a prerequisite for the functioning of the seminar, and therefore also for your learning success. Please do read the texts and be prepared to discuss them with your fellow students!

All participants are asked to bindingly confirm their participation via e-mail (kanthak@wiso.uni-koeln.de) until **Monday, 24 October, 10:00** at the very latest. This is necessary to allow for planning dependability.

Working requirements and assessment

Expectations:

- active participation in discussions
- preparation for discussions of weekly readings (ILIAS)
- input presentation
- research design for term paper
 - o elaborated research design (2-3 pages) submission deadline: **January 14, 2018**
 - o presentation *and* discussion of elaborated designs
- term paper
 - o approx. 2,500 words (4 ECTS) *or* approx. 3,500 words (6 ECTS)
 - o 1,5 line spacing, full justification, page numbers
 - o submission deadline (pdf and printout): **March 12, 2018**
